

# Equipment Management, managed better.

OneTrack is a proprietary equipment management software solution from MSD. OneTrack is designed to maximize device utilization, eliminate asset loss and save time over manual tracking systems. Currently, over 200,000 medical devices are managed with OneTrack.

## OneTrack Features:

- Bar code scanning for speed & accuracy
- User Scorecard for visibility of key equipment management activities
- Tracks the status, location and patient usage of all equipment and accessories
- OneTrack exceeds accreditation standards for Preventative Maintenance scheduling and tracking
- Assists in compliance with FDA's Safe Medical Devices Act reporting requirements
- Maximizes Utilization to increase profits and lower costs
- RFID Expansion Program
- Secure data for HIPAA compliance

*A Web-based bar code-driven system, OneTrack provides the two most important features of any equipment management system: Visibility & Accountability*
